Baking Essentials

Our Baking Essentials Guides are tailored to state-based ranges (NSW/ACT, QLD, VIC and WA), bringing together the products you reach for every day - bakers flour, bread mixes, bread improvers & conditioners, and bakers yeast - to help you get through the rush, day in and day out.

Select your state to get started.

- **NSW/ACT**
- **QLD**
- **VIC**
- **WA**

Signature Sweet National Range

From cakes to muffins, custards to specialty blends, this guide brings together the sweet goods you rely on to help you deliver them with consistency, speed and confidence.

Health & Specialty National Range

Here you'll find the health and specialty flours you rely on most: from ancient grains to gluten free, high-protein, and functional blends, all backed by our consistent quality and dependable service.

Pizza & Pasta National Range

From crisp, low-hydration bases to airy crusts, our pizza flours help you create your signature style. For pasta, premium semolinas and continental sharps deliver an authentic al dente bite, batch after batch.

Baking essentials Product Guides

Your core ingredients.
Our everyday support.

We know how fast things move in a commercial bakery. That's why this guide brings together the products you reach for every day – bakers flour, bread mixes, bread improvers & conditioners, and bakers yeast, the ones that help you get through the rush, day in and day out.

This guide is designed to support the day-to-day needs of commercial bakeries across Australia with trusted solutions that keep you going, backed by a supportive partner who understands the rhythm of your day.

Our Baking Essentials Guide is set up by state so you can find what's relevant to you. Click below to choose your state:

We **BACK YOU** in your Bake

NSW / ACT

When you choose Mauri, you're choosing more than high-quality ingredients – you're gaining a partner who understands the demands of commercial baking and is invested in your success. Our technical team is available to support you with challenges, recipe adjustments, or process improvements, whether on site or by phone. Let's Bake Better Together.

Bakers Flour

Reliable flour. Repeatable results.

Bakers flours are milled from 100% Australian wheat and tested to make sure you get consistent quality and performance, batch after batch. Whether you're hand-shaping loaves or making high-volume essentials, you can count on strength, extensibility and reliability.

Bread Mixes

Built to save time. Designed to hold quality.

Bread mixes don't mean shortcuts. Ours are designed to streamline production while still letting you deliver flavour and texture your customers come back for. From white loaves to grainy favourites, our bread mixes are here to support your creativity and consistency.

Bread Improvers & Conditioners

Because not every dough is the same.

Every bakery has its own way of working and our range of improvers and conditioners are built to support that. Whether you're looking to strengthen dough, improve volume, or enhance softness over shelf life, our flexible solutions help you get the best out of your bakes.

Bakers Yeast

Trust the rise. Every time.

Our bakers yeast range is tested to deliver reliable fermentation across a range of doughs and baking conditions. Whether you're baking essentials or specialty goods, you'll get the texture and finish you're known for, with the flavour and aroma to match.

NSW / ACT

Bakers Flour

Mauri Bakers Flour is made from 100% Australian wheat, delivering consistent strength and performance across seasons. Trusted by bakers nationwide, it's versatile, reliable, and backed by local expert support, helping you bake with confidence, every day.

Bread Mixes

Mauri Bread Mixes are expertly crafted to help bakers produce premium-quality bread with superior taste, texture, and appearance, without the complexity of scratch baking. Each mix contains a perfect blend of dry active ingredients, requiring only water and yeast to deliver consistent results every time.

Whether you're baking soft white loaves, crusty artisan breads, or hearty wholemeal and grain varieties, our Bread Mixes offer:

- ✓ Reliable performance across a wide range of bread styles.
- ✓ Time-saving convenience with reduced weigh-up and preparation steps.
- ✓ Space-efficient storage ideal for busy bakeries with limited room.
- ✓ Versatile applications from loaves and rolls to pizza bases and savoury inclusions.
- ✓ Customisation potential to add your own signature ingredients like cheese, olives, or herbs.

Our Bun Bread Mix is super consistent. It gives a great product every time and saves a mountain of time through not needing to weigh up multiple ingredients. It's just as simple as pour, mix, add water and yeast, then go! ”

White M Premix	A bread concentrate for a softer crumb and crispier crust with no preservatives. Includes improver and salt. 4% application rate.	77545	15kg	Breads, rolls, buns, meal & grain breads.

Bread Improvers & Conditioners

At Mauri, we know that great baking is both an art and a science. That's why we've developed a range of functional ingredients designed to support bakers in creating consistently high-quality products, whether you're crafting soft sandwich loaves, crusty artisan breads, or anything in between.

Bread Improvers: The foundation of structure

Think of bread improvers as the framework that holds your baked goods together, like the frame of a house. These blends, typically made with ascorbic acid, enzymes and emulsifiers, help strengthen dough and improve volume and texture. Whether you need a versatile option like our All Purpose Bread Improver, or something more targeted like Soft or Crusty Specialty Improver, we've got you covered.

Clean Label Solutions: Simplicity meets transparency

More and more customers are looking for clean label options, and we're proud to offer solutions that meet that demand. Our CL Supa Soft Improver is free from emulsifiers, meaning fewer additives and a simpler ingredient list. It's a great choice for bakers who want to keep things natural and transparent without compromising on performance.

Dough Strengtheners: Built for add-ins

When you're working with doughs that include grains, seeds, or dried fruits, strength matters. Our dough strengtheners combine enzymes with DATEM emulsifier to reinforce structure while maintaining a soft, appealing texture. They're designed to help your dough hold up under pressure - literally.

Crumb Softeners: Softness that lasts

Softness is key to customer satisfaction, and we offer two great options. CL Premium Softener is a clean label product made with just flour and enzymes, perfect for those seeking simplicity. For extended softness and shelf life, Universal Softener includes emulsifiers to keep your bread fresher for longer.

Dough Relaxers: Smoother processing, better results

Efficiency in the bakery matters, and that's where our Relax Mix comes in. It helps reduce mixing time, improves dough development, and minimises shrinkage in sheeted products. The result? More consistent outcomes and smoother production runs.

Whether you're looking to improve structure, softness, or efficiency, Mauri's range of Improvers, Strengtheners, Softeners and Relaxers are here to support your craft.

All Purpose Improver

Product Code: 84257 **10kg**

Multi-purpose improver for a wide range of bakery applications to impact volume, texture and crumb softness. A soy blend with a 1% application rate.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

Soft Specialty Improver

Product Code: 84258 **10kg**

Delivers a white, soft crumb that achieves excellent volume in high top loaves and helps retain its freshness for longer. 1% application rate.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

Universal Softener

Product Code: 16394 **10kg**

Dough conditioner developed to improve crumb structure with additional softness and freshness. Use with an improver 0.5% application rate. RSPO Certified.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

NSW / ACT

Other Improvers & Conditioners

PRODUCT	DESCRIPTION	PRODUCT CODE	WEIGHTS	APPLICATION
Crusty Improver	Achieves high volume loaves with a superior crust and a defined split. A soy-based blend with a 1% application rate.	86408	10kg	Breads, rolls, baguettes, meal and grain, artisan products, pizza, Turkish bread, focaccia, instant & retarded doughs.
CL Supa Soft Improver	Premium soy-based, emulsifier-free improver with excellent dough handling, volume, texture and softness over a prolonged shelf life. Clean label friendly, use at 0.5% application rate.	78119	15kg	Breads, rolls, baguettes, meal and grain, artisan products, pizza, Turkish bread, focaccia, instant & retarded doughs.
CL Premium Softener	Premium softener designed for commercial manufacture of various baked products. Soy & emulsifier free.	81985	15kg	Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia & donuts.
Relax Mix	Conditioner that assists with dough development and sheeting, reducing mixing and resting time. Use with an improver at 0.1% - 0.5% application rate.	16602	25kg	Breads, rolls, buns, meal and grain bread, Turkish bread, pizza, focaccia, sheeted pastry & sheeted doughs.
Boost Dough Conditioner	Label-friendly enzyme-based dough strengthener. Reduces gluten addition by up to 50% and improves dough strength and product resilience.	101858	12.5kg	Breads, rolls, buns, meal and grain, pizza, Turkish bread & focaccia.

Because of our long-standing relationships with our suppliers and our expertise in product development, we've got a wide range of Improvers, Softeners and Strengtheners designed for all parts of the industry. So, whether it's hot bread shops right up to plant bakeries, we can tailor our Improvers for those specific industries.

Bakers Yeast

Yeast is vital in bread making, not only for leavening, but also for delivering the wonderful flavour and aroma we all love from freshly baked bread. Mauri's Yeast Range is crafted to meet the diverse needs of Australian bakers, offering consistent performance, reliable fermentation, and excellent dough development.

Bake with confidence and consistency in each batch.

Whether you choose Instant Dry or Compressed, our yeast delivers:

- ✓ High activity fermentation for optimal dough rise and texture.
- ✓ Reliable gas production for consistent volume and crumb structure.
- ✓ Enhanced flavour through natural fermentation by-products.
- ✓ Convenient formats tailored to bakery size and process—from portion packs to bulk solutions.
- ✓ No refrigeration required for Instant Dry Yeast, with long shelf life and easy storage.

Instant Dry Yeast

Product Code: 60695 **10kg:** (20 x 500g Packs)

Product Code: 35874 **10kg:** (2 x 5kg Packs)

A high activity instant dried yeast packed in convenient portions.

Application: Breads, rolls, buns, baguettes, grain and fruit breads, artisan bread, Turkish bread, pizza, instant & retarded doughs.

Yeast Compressed

Product Code: 10897 **12kg:** (12 x 1kg Packs)

A high activity compressed yeast packed in convenient portions.

Application: Breads, rolls, buns, baguettes, grain and fruit breads, artisan bread, Turkish bread, pizza, instant & retarded doughs.

Bread Mixes

Mauri Bread Mixes are expertly crafted to help bakers produce premium-quality bread with superior taste, texture, and appearance, without the complexity of scratch baking. Each mix contains a perfect blend of dry active ingredients, requiring only water and yeast to deliver consistent results every time.

Whether you're baking soft white loaves, crusty artisan breads, or hearty wholemeal and grain varieties, our Bread Mixes offer:

- ✓ Reliable performance across a wide range of bread styles.
- ✓ Time-saving convenience with reduced weigh-up and preparation steps.
- ✓ Space-efficient storage ideal for busy bakeries with limited room.
- ✓ Versatile applications from loaves and rolls to pizza bases and savoury inclusions.
- ✓ Customisation potential to add your own signature ingredients like cheese, olives, or herbs.

Our Bun Bread Mix is super consistent. It gives a great product every time and saves a mountain of time through not needing to weigh up multiple ingredients. It's just as simple as pour, mix, add water and yeast, then go!

White M Premix	A bread concentrate for a softer crumb and crispier crust with no preservatives. Includes improver and salt. 4% application rate.	77545	15kg	Breads, rolls, buns, meal & grain breads.

Bread Improvers & Conditioners

At Mauri, we know that great baking is both an art and a science. That's why we've developed a range of functional ingredients designed to support bakers in creating consistently high-quality products, whether you're crafting soft sandwich loaves, crusty artisan breads, or anything in between.

Bread Improvers: The foundation of structure

Think of bread improvers as the framework that holds your baked goods together, like the frame of a house. These blends, typically made with ascorbic acid, enzymes and emulsifiers, help strengthen dough and improve volume and texture. Whether you need a versatile option like our All Purpose Bread Improver, or something more targeted like Soft or Crusty Specialty Improver, we've got you covered.

Clean Label Solutions: Simplicity meets transparency

More and more customers are looking for clean label options, and we're proud to offer solutions that meet that demand. Our CL Supa Soft Improver is free from emulsifiers, meaning fewer additives and a simpler ingredient list. It's a great choice for bakers who want to keep things natural and transparent without compromising on performance.

Dough Strengtheners: Built for add-ins

When you're working with doughs that include grains, seeds, or dried fruits, strength matters. Our dough strengtheners combine enzymes with DATEM emulsifier to reinforce structure while maintaining a soft, appealing texture. They're designed to help your dough hold up under pressure - literally.

Crumb Softeners: Softness that lasts

Softness is key to customer satisfaction, and we offer two great options. CL Premium Softener is a clean label product made with just flour and enzymes, perfect for those seeking simplicity. For extended softness and shelf life, Universal Softener includes emulsifiers to keep your bread fresher for longer.

Dough Relaxers: Smoother processing, better results

Efficiency in the bakery matters, and that's where our Relax Mix comes in. It helps reduce mixing time, improves dough development, and minimises shrinkage in sheeted products. The result? More consistent outcomes and smoother production runs.

Whether you're looking to improve structure, softness, or efficiency, Mauri's range of Improvers, Strengtheners, Softeners and Relaxers are here to support your craft.

All Purpose Improver

Product Code: 84257 **10kg**

Multi-purpose improver for a wide range of bakery applications to impact volume, texture and crumb softness. A soy blend with a 1% application rate.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

Soft Specialty Improver

Product Code: 84258 **10kg**

Delivers a white, soft crumb that achieves excellent volume in high top loaves and helps retain its freshness for longer. 1% application rate.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

Universal Softener

Product Code: 16394 **10kg**

Dough conditioner developed to improve crumb structure with additional softness and freshness. Use with an improver 0.5% application rate. RSPO Certified.

Application: Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia, donuts, instant & retarded doughs.

Other Improvers & Conditioners

PRODUCT	DESCRIPTION	PRODUCT CODE	WEIGHTS	APPLICATION
Crusty Improver	Achieves high volume loaves with a superior crust and a defined split. A soy-based blend with a 1% application rate.	86408	10kg	Breads, rolls, baguettes, meal and grain, artisan products, pizza, Turkish bread, focaccia, instant & retarded doughs.
CL Supa Soft Improver	Premium soy-based, emulsifier-free improver with excellent dough handling, volume, texture and softness over a prolonged shelf life. Clean label friendly, use at 0.5% application rate.	78119	15kg	Breads, rolls, baguettes, meal and grain, artisan products, pizza, Turkish bread, focaccia, instant & retarded doughs.
CL Bread Improver	An emulsifier-free improver with no added soy, designed to deliver good handling, volume, texture and softness. Clean label friendly, use at 0.5% application.	78120	15kg	Breads, rolls, baguettes, meal and grain, artisan products, pizza, Turkish bread, focaccia, instant & retarded dough.
CL Premium Softener	Premium softener designed for commercial manufacture of various baked products. Soy & emulsifier free.	81985	15kg	Breads, rolls, buns, baguettes, meal and grain, fruit breads, artisan, pizza, Turkish bread, focaccia & donuts.
Relax Mix	Conditioner that assists with dough development and sheeting, reducing mixing and resting time. Use with an improver at 0.1% - 0.5% application rate.	16602	25kg	Breads, rolls, buns, meal and grain bread, Turkish bread, pizza, focaccia, sheeted pastry & sheeted doughs.
Boost Dough Conditioner	Label-friendly enzyme-based dough strengthener. Reduces gluten addition by up to 50% and improves dough strength and product resilience.	101858	12.5kg	Breads, rolls, buns, meal and grain, pizza, Turkish bread & focaccia.

Because of our long-standing relationships with our suppliers and our expertise in product development, we've got a wide range of Improvers, Softeners and Strengtheners designed for all parts of the industry. So, whether it's hot bread shops right up to plant bakeries, we can tailor our Improvers for those specific industries.

JOHN KRUIIK

Bakers Yeast

Yeast is vital in bread making, not only for leavening, but also for delivering the wonderful flavour and aroma we all love from freshly baked bread. Mauri's Yeast Range is crafted to meet the diverse needs of Australian bakers, offering consistent performance, reliable fermentation, and excellent dough development.

Bake with confidence and consistency in each batch.

Whether you choose Instant Dry or Compressed, our yeast delivers:

- ✓ High activity fermentation for optimal dough rise and texture.
- ✓ Reliable gas production for consistent volume and crumb structure.
- ✓ Enhanced flavour through natural fermentation by-products.
- ✓ Convenient formats tailored to bakery size and process—from portion packs to bulk solutions.
- ✓ No refrigeration required for Instant Dry Yeast, with long shelf life and easy storage.

Instant Dry Yeast

Product Code: 60695 **10kg:** (20 x 500g Packs)

A high activity instant dried yeast packed in convenient portions.

Application: Breads, rolls, buns, baguettes, grain and fruit breads, artisan bread, Turkish bread, pizza, instant & retarded doughs.

Yeast Compressed

Product Code: 10897 **12kg:** (12 x 1kg Packs)

A high activity compressed yeast packed in convenient portions.

Application: Breads, rolls, buns, baguettes, grain and fruit breads, artisan bread, Turkish bread, pizza, instant & retarded doughs.

Baking

We **BACK YOU** in your Bake

WA

When you choose Mauri, you're choosing more than high-quality ingredients – you're gaining a partner who understands the demands of commercial baking and is invested in your success. Our technical team is available to support you with challenges, recipe adjustments, or process improvements, whether on site or by phone. Let's Bake Better Together.

Bakers Flour

Reliable flour. Repeatable results.

Bakers flours are milled from 100% Australian wheat and tested to make sure you get consistent quality and performance, batch after batch. Whether you're hand-shaping loaves or making high-volume essentials, you can count on strength, extensibility and reliability.

Bread Mixes

Built to save time. Designed to hold quality.

Bread mixes don't mean shortcuts. Ours are designed to streamline production while still letting you deliver flavour and texture your customers come back for. From white loaves to grainy favourites, our bread mixes are here to support your creativity and consistency.

Bread Improvers & Conditioners

Because not every dough is the same.

Every bakery has its own way of working and our range of improvers and conditioners are built to support that. Whether you're looking to strengthen dough, improve volume, or enhance softness over shelf life, our flexible solutions help you get the best out of your bakes.

Bakers Yeast

Trust the rise. Every time.

Our bakers yeast range is tested to deliver reliable fermentation across a range of doughs and baking conditions. Whether you're baking essentials or specialty goods, you'll get the texture and finish you're known for, with the flavour and aroma to match.

Bakers Flour

Mauri Bakers Flour is made from 100% Australian wheat, delivering consistent strength and performance across seasons. Trusted by bakers nationwide, it's versatile, reliable, and backed by local expert support, helping you bake with confidence, every day.

- ✓ Consistent protein levels deliver reliable dough strength and performance across seasonal variations.
- ✓ Milled to commercial baking standards with proven performance in real bakeries, trusted by professionals across Australia for consistency and quality for over 100 years.
- ✓ Versatile flour range suitable for a wide variety of baked goods, from soft rolls to crusty loaves.
- ✓ Backed by Mauri technical support, with access to local expert advice and troubleshooting to help optimise your bake.
- ✓ Available in bulk formats for convenient large-scale production and efficient inventory management.

The most important ingredient we use is Mauri Supreme Flour. We use it across around 80% of our production, mainly in our pie bases and puff pastry. It consistently produces a golden colour and flaky pastry, and customers regularly comment on how great our pastry tastes.

We **BACK YOU** in your Bake

NATIONAL

When you choose Mauri, you're choosing more than high-quality ingredients – you're gaining a partner who understands the demands of commercial baking and is invested in your success. Our technical team is available to support you with challenges, recipe adjustments, or process improvements, whether on site or by phone. Let's Bake Better Together.

Culinary & Specialty Flours

STRONG foundations. Endless possibilities.

Premium flours for noodles, pasta, steamed buns and more – crafted for versatility and performance.

Semolinas

GOLDEN tones. Gold-medal performance.

Versatile semolinas delivering authentic colour, texture and performance for pasta, artisan breads, specialty baking, dusting and toppings.

All Purpose Flours

Pure VERSATILITY. Trusted performance.

An essential kitchen staple for pastries, cakes, pizzas, batters, and sauces, delivering smooth, consistent results.

Specialty Cake, Biscuit & Pastry Flours

Delicate bakes. DEPENDABLE results.

Flours designed for cakes, biscuits, and pastries – delivering lightness, texture, and reliability.

Gluten Free Range

TEXTURE and flavour for all.

A comprehensive range of gluten free mixes and flours for inclusive baking without compromise.

Grains & Meal Blends

LAYER in the GOODNESS.

Wholegrain, seed, and meal blends to boost nutrition, flavour, and texture in every bake.

Culinary & Specialty Flours

Every great bake starts with the right foundation. Our range of culinary and specialty flours is crafted to give commercial bakers the consistency, colour, and performance you simply can't live without. Whether you're making noodles, pasta, steamed buns or bagels, trust Mauri's premium flours to support your creativity and deliver consistently, batch after batch.

With a long heritage of quality and a commitment to innovation, our specialty flours are expertly milled to help you achieve superior texture and structure in every product. Our heritage extends to supporting our customers too. We understand your world and we're committed to your success. That's Baking Better Together.

- ✓ Versatile across bakery and food applications, suitable for noodles, pasta breads, buns and specialty range.
- ✓ Consistent and dependable results batch after batch.

For products like steamed buns, udon and dumpling wrappers where visual appeal matters, Special White Flour delivers the brightness and consistency needed for a great finish.

Tom Kennedy

Mauri Head of Technical Applications

Special White Flour

Product Code: 16778 **25kg**

Premium low ash flour with moderate to high protein levels and superior colour grade.

Application: Noodles, pasta, steamed buns & bagels.

Strong Low Ash Flour

Product Code: 100704 **25kg**

Low ash flour with high-protein levels and superior colour grade.

Application: Noodles, pasta, steamed buns & bagels.

Kangaroo Low Ash Noodle Flour

Product Code: 102448 **25kg**

Moderate protein flour with an exceptional white colour, formulated for fresh and dry noodle manufacture.

Application: Fresh and dried noodles.

Pioneer Flour

Product Code: 103891 **25kg**

High-ash, high-protein flour providing non-functional protein for binding applications and for use in pre-ferments, supporting flavour development and fermentation performance.

Application: Binders, sourdough pre-ferments, atta-style specialty breads (e.g. naan, roti) & feed applications.

Soya Flour

Product Code: 15364 **20kg**

A full fat, enzyme active soy flour which helps provide a superior white crumb colour in breads.

Application: Breads and rolls.

Semolinas

Mauri's semolina range is crafted for authentic texture, colour, bite and integrity in every batch. From traditional Durum Semolina to versatile Continental Sharps, Mauri supports consistency and creativity in every kitchen – whether you're hand-shaping small batches or producing at scale.

- ✓ Ideal for pasta, pizza and artisan bread applications.
- ✓ Versatile across a range of health and specialty bakery uses.
- ✓ Consistent performance, delivering reliable results in commercial production.

Durum Semolina

Delivers superior strength and golden colour expected from high-quality pasta products.

Application: Pasta, artisan breads, dusting & topping.

Hard Wheat Semolina

A hard wheat semolina made from premium white wheat.

Application: Pasta, artisan breads, dusting & topping.

Continental Sharps

Fine semolina produced from hard wheat.

Application: Dusting, topping & specialty products.

All Purpose Flours

A versatile pantry staple designed to perform across a wide range of sweet and savoury applications. From breads, cakes and pastries to batters, coatings and sauces, this flour delivers consistent results and reliable functionality in every use.

- ✓ Versatile across applications – Suitable for breads, cakes, pastries as well as batters, coatings and sauces.
- ✓ Reliable performance – Delivers consistent results with balanced structure and texture across sweet and savoury products.
- ✓ Efficient to work with – Supports smooth mixing, handling and processing in high-volume bakery and kitchen environments.

Sunfield Plain Flour

A versatile general-purpose flour with moderate protein levels.

Application: Flat bread, muffins, sauces & dusting.

Sunfield Self Raising Flour

General purpose flour complete with leavening agents to provide a light and fluffy texture.

Application: Scones, muffins & cakes.

Specialty Cake, Biscuit & Pastry Flours

Whether you're baking delicate sponges, crisp biscuits or tender pastries, elevate your sweet and savoury creations with Mauri's specialty cake, biscuit, and pastry flours. Milled for lightness, consistent texture and dependable rise, you can bake with confidence knowing your flour will perform exactly as expected. We're here to help you create, innovate, and delight your customers.

- ✓ Fine, specialty-milled flours delivering light, soft cakes and crisp, delicate biscuits.
- ✓ Consistent performance for reliable results in every bake.
- ✓ Versatile across cakes, biscuits, pastries and other sweet applications.

Eagle Pie and Pastry Flour is a good all round flour for pastry that is versatile for puff and pie bottoms.

SCOTT HARRINGTON

Mauri Technical Applications Manager

Finetex Hi Ratio Cake Flour

Product Code: 28310 **25kg**

Streamed fine white chlorinated flour. Ideal to support the high sugar content in high ratio cakes to ensure cakes are light & fluffy.

Application: Sponges, angel and utility cakes & specialty food coatings.

Everest Soft Biscuit Flour

Product Code: 16836 **25kg**

Milled from low protein soft wheats that are high in starch and low in water absorption, for crispier biscuits.

Application: Biscuits, cookies, snack foods & sauces.

Pastry Flour

Product Code: 14998 **25kg**

A medium to low protein flour produced from moderate strength wheat to produce a tender and delicate result.

Application: Puff and short crust pastry, including danishes, croissants, pies & tarts.

Eagle Pie & Pastry Flour

Product Code: 16877 **25kg**

A medium to low protein flour produced from moderate strength wheat for the manufacture of pastry products.

Application: Pies and sausage rolls.

Gluten Free Range

click here for recipe ideas

Developed to meet the needs of coeliac and gluten-sensitive customers, Mauri's inclusive gluten free range is crafted for uncompromising taste and quality. These mixes and flours deliver the taste, texture, and performance you'd expect from a leading national baking partner.

From soft breads to moist cakes and muffins, our gluten free products make it easy to expand your menu and satisfy the needs of every customer. With Mauri, you can bake with confidence – knowing that quality and care sit at the heart of every gluten free blend.

- ✓ Gluten Free Products* suitable for customers seeking gluten free options.
- ✓ Versatile for a wide range of sweet and savoury applications, from breads, cakes, muffins, slices and more.
- ✓ Reliable performance across gluten-free baking, helping achieve consistent results.

Our Gluten Free Banana Bread Mix is an extremely versatile gluten free utility cake mix. It can be used in so many cake applications even without adding banana!

JUSTIN KING

Mauri Technical Applications Manager

* Produced on equipment that also handles gluten-containing products. Each batch is tested to confirm no detectable gluten in line with FSANZ gluten-free requirements.

Gluten Free Soft Bread Mix

Product Code: 75673 **15kg**

Produces high quality, soft delicious yeast raised bread as good as the real thing. It's versatile and easy to use.

Application: Loaves, rolls & cookies.

Gluten Free Crusty Bread Mix

Product Code: 79699 **15kg**

A versatile product that provides an authentic crusty exterior with excellent crust characteristics and a soft internal crumb structure.

Application: Rolls, loaves, baguettes, cobs, vienna & Easter buns.

Gluten Free Banana Bread Mix

Product Code: 73611 **15kg**

This versatile mix maintains moistness, while delivering a smooth and rich taste.

Application: Fruit loaves, cakes & muffins.

Gluten Free Mudcake Mix

Product Code: 73612 **15kg**

Produces a consistently rich and moist crumb with a firm texture. This mix is suitable for both white and dark chocolate varieties.

Application: Mudcakes, cakes & cupcakes.

ARTISAN TIP

For expert demonstrations on dough mixing, stretching and baking at different hydration and fermentation levels, [watch our video guides](#).

inside your dough

NATIONAL

Great pizza starts with great dough and great dough starts with hydration and fermentation. Mauri 00 Flour is engineered for versatility. Whether you're working with a crisp, low-hydration base or a light, open-crumbed high-hydration crust, our flour delivers the strength and absorption to make it work.

From short to long, cold fermentation, Mauri 00 Flour supports a wide range of dough styles and processes so your pizza is on point, no matter how you make it.

your HYDRATION
your FERMENTATION
and the flour that makes it all work.

ARTISAN TIP

Use longer fermentation for more flavour.
Mauri 00 Flour is designed to hold up to both short and long processes.

Hydration Levels

Low Hydration (55-60%)

Doughs with lower water content produce a firmer, more manageable dough that's easy to shape and ideal for thin, crisp bases. Mauri 00 Flour ensures the dough remains extensible and resists tearing, even at lower hydration.

Result: *CRISP*, thin Italian-style pizza with a *delicate* crunch.

Medium Hydration (60-65%)

This range is suitable for Neapolitan pizza. The dough is soft and elastic, easy to stretch by hand, and delivers a balanced crumb - light, yet with enough chew. Mauri 00 Flour's protein quality supports excellent gluten development, so the dough holds its shape and bakes evenly.

Result: *SOFT*, airy crust with a golden, blistered edge.

High Hydration (65-75% and above)

High hydration doughs are wetter and stickier, requiring more skill to handle. The reward is a highly open crumb structure and a light, airy crust with pronounced bubbles and a moist interior. Mauri 00 Flour's strength and absorption capacity allows the dough to take on more water without collapsing, supporting long fermentation and high-hydration styles like contemporary Neapolitan and Roman pizza. This hydration range is also perfect for rustic Italian breads like ciabatta and focaccia, which rely on Mauri 00 Flour's strength and absorption capacity to achieve their airy, open crumb and delicate chew.

Result: Open, airy, artisan-style crust with a moist, *TENDER* bite.

Fermentation Levels

Short Fermentation (2-6 hours)

For quick service or same-day dough, Mauri 00 Flour provides reliable fermentation activity and gluten strength, ensuring the dough rises well and remains easy to work with.

Result: Consistent, *RELIABLE* rise and a mild flavour profile.

Long Fermentation (12-48 hours, cold or ambient)

Extended fermentation, especially under refrigeration, develops deeper flavour and a more complex crumb. Mauri 00 Flour's balanced protein supports slow, steady fermentation, preventing over-proofing and maintaining dough integrity.

Result: Rich, nuanced flavour, and a *BEAUTIFULLY* blistered crust.

ARTISAN TIP

Adjust hydration to match your desired crust style and kitchen process - higher hydration for open, airy crusts; lower for crisp, thin bases.

NATIONAL

Meet our Pizza

expert

mauri
SINCE 1872
Scott Harrington

Scott Harrington is part of our technical applications team, working hands-on with pizza professionals to get the best from their dough. As an AVPN* trained specialist, he shares practical advice on everything from fermentation to hydration helping customers get consistent results with Mauri 00 Flour.

Mauri 00 Flour Q&A with Scott

Scott, can you tell us about your role at Mauri and how it connects to our flour products?

I'm part of the technical applications team, working directly with customers to help them get the best results in their restaurants. Sometimes that means troubleshooting when things aren't going well, but often it's about helping customers grow, refine recipes, or train staff. It's a creative role - no two days are the same, and we get to partner closely with pizza professionals to support their craft.

From your experience, what do pizza artisans appreciate most about Mauri 00 Flour?

Two words - versatility and stability. Mauri 00 Flour performs across a huge range of styles - from high-hydration to low-hydration doughs, and different mixing methods. It's stable over long fermentations, which is a big deal for pizza artisans wanting to develop their own signature products. It also takes on water really well, making it easy to handle and work with.

What sets Mauri 00 Flour apart in terms of consistency?

Consistency comes from being milled at a single site in Australia. Whether you're in Queensland, Victoria, or Western Australia, you're getting the same flour every time. That's a big tick for pizza professionals who rely on predictable results.

Are there unique technical advantages to Mauri 00 Flour?

Absolutely. We've hit the right marks on ash content, which helps deliver stability through fermentation. We did a lot of homework - trialling flours, testing fermentation times, and making sure the end result was right. It's not just about specs; it's about how the flour performs in real ovens.

How does Mauri 00 Flour support authenticity in pizza, especially as an Australian-made product?

Authenticity is personal - every pizza artisan has their own interpretation. Mauri 00 Flour's versatility lets them create their own authentic style, whether that's through hydration, fermentation, or process. It stands up to whatever the pizza professional wants to do, and that's what makes it special.

How does it perform in Italian breads like focaccia and ciabatta?

It's amazing for both. Focaccia and ciabatta are high-hydration breads that need elasticity and strength. Mauri 00 Flour delivers a great result - open crumb, airy texture, and beautiful crusts.

Pizza Flour Range

Mauri 00 Flour

- ✓ Milled to Italian Type "00" specification for authentic Italian style pizza bases.
- ✓ Versatile hydration performance delivering consistent results for both low and high hydration doughs.
- ✓ Supports long fermentation to create rich flavour.
- ✓ Proudly Australian made and crafted from premium Australian wheat, supporting local farmers.
- ✓ Reliable, consistent quality trusted by pizza professionals for everyday baking.
- ✓ Expert support available with AVPN* trained specialist ready to help you perfect your pizza.

Inspired by Italian pizza traditions, Mauri's pizza flours are developed to perform in professional kitchens. Whether you're aiming for a crisp base or a light, open crumb, each blend supports excellent dough handling and bake quality. The result is dependable performance across multiple pizza styles.

*Associazione Verace Pizza Napoletana

Milano Pizza Flour

Medium to high protein pizza flour offering easy sheeting, smooth handling, and consistent results across all pizza styles and ovens.

Application: Pizza and focaccia.

Mauri 00 Flour

Crafted with premium Australian wheat to deliver consistent performance across all pizza styles. Proudly milled in Australia in collaboration with Italian flour experts and milled to Italian Type "00" specification.

Application: All artisan pizza styles and signature crusts, focaccia, ciabatta & artisan breads.

Continental Sharps

Fine semolina produced from hard wheat, delivering a distinctive yet fine granular texture ideal for use as a dusting flour, minimising bench and peel sticking during handling and baking.

Application: Dusting, topping & specialty products.

Did you know?

Mauri 00 Flour isn't just for pizza. It's the secret to authentic Italian breads:

Focaccia: Mauri 00 Flour supports high hydration and with the addition of olive oil, creates a soft, airy interior and golden crust.

Ciabatta: Mauri 00 Flour delivers strong gluten development for its signature open crumb and chewy bite.

Pasta Range

Mauri Semolinas

- ✓ Ideal for pasta with authentic bite.
- ✓ Versatile use, suitable for both fresh and dried pasta and noodles.
- ✓ Consistent performance delivering reliable results for commercial production.

Mauri's semolina range is crafted for authentic texture, colour, bite and integrity in every batch. From traditional Durum Semolina to versatile Continental Sharps, Mauri supports consistency and creativity in every kitchen - whether you're hand-shaping small batches or producing at scale.

Durum Semolina

Delivers superior strength and golden colour expected from high quality pasta products.

Application: Pasta, dusting & topping.

Hard Wheat Semolina

A hard wheat semolina made from premium white wheat.

Application: Pasta, dusting & topping.

Continental Sharps

Fine semolina produced from hard wheat.

Application: Dusting, topping & specialty products.
